1. Law Firms
2. Commission Agents

Dear Sir/Madam,

CONSULTATION MEETING OF REGULATING COMMISSION AGENTS AND LAW FIRMS WHICH ARE HELPING UGANDANS TO APPLY FOR ONLINE GOVERNMENT SERVICES

Triple D Empire (formerly Dithree Group) creates business models and social programs of articulating public policies into private projects. Mobilize domestic resources of creating collective prosperity opportunities. And propose public sector solutions of bridging private sector challenges. This teamwork, mental work and network instills a sense of direction, a sense of dignity and a sense of belonging in Africans to speak with authority in the global economics. Hence de-colonizing Africa. Therefore, this is to propose that commission agents, government organizations and law firms meet for a consultation on how best to certify agents and firms which are coordinating Ugandans to apply for government online services so as to protect the interests of law firms, the online applicants, the commission agents and the government organization. it has come to our attention that various government organizations don't want to work with us representing applications on Vehicle registration/transfer, TIN application, Land title transfer/registration, Visa application, Business registration, Passport application, document registration, company registration etc. because:-

1. A number of banks have issued loans against land titles and logbooks were the borrower used powers of attorney to secure the loan without the consent of the property owner simply because of online applications which are NOT THAT MUCH varied by URSB upon issuing.
2. The commission agents and law firms charge applications which increase the cost of applying on the side of the applicant or adds a cost to free services.
3. Some **informal agents** disappear with the money of applicants
4. Other challenges we don't know which you are privy to

Ever since government introduced various online services, some commission agents and law firms are paying employ salaries, office rent and trade license to provide online intermediary services. And given

the long queues at your **TREP** offices were some of the employees have an I DON'T CARE attitude and the complexity which some applicants endure to navigate your websites, they are willing to pay us as much as we ask them for provided that they can conveniently get the service. Such people are not interested in learning the complexity of your websites simply because they just need the service probably once after so many years. For example, a clients who needs a TIN can pay between fifteen thousand shillings (UGX-15,000) and two hundred thousand shillings (UGX-200,000) depending on who needs it and for what purpose. Our services in away helps government to fast-track revenue collection, the applicant to pursue their aspiration on time and the agents/firms to create jobs because **Vision 2040 and Agenda 2063** emphasis the need to mobilize domestic resource for collective prosperity and sustainable development. Both the Quran in Surah Al-Imran 3:104 and the Bible in Mathew 9:35-37 complement each other on the fact that African challenges called Triple D Empire to apply the mind on a full state of identifying African Solutions jealously, on principle and by conviction outside the square because a successful society is based on the skills and values of its leadership. The economic success of a nation is based on each individual business and job. Leadership is the process of social influence where one person mobilizes the aid or support of others in the accomplishment of a common goal or task. While development is the changing of society with effects to its norms, values, institutions, attitude of its people, methods of production and the way in which resources are distributed for the attainment of total the transformation. The only way African can guaranty development is by **STRICTLY** appointing professionally competent ministers/politicians, technocrats/civic servants, of integrity with better remuneration **ON CONDITION** that they take full responsibility of the failure or the success of the organization, ministry or department because politicking for personal interests is failing many development projects yet political will plays a major role in propelling national interests.

Yours Faithfully,

Ddembe Diamondiso Ddumba

- The Managing Director, Sanlam Insurance
- The Chairman and CEO, Carrefour market Uganda limited
- The Managing Director, Umeme Uganda Limited
- The MD/CEO, National Water and Sewerage Corporation
- The Managing Director, Uganda Electricity Distribution Company Limited
- The Commissioner General, Uganda Revenue Authority
- The Managing Director, National Social Security Fund

Dear Sir/Madam,

CREATE AN INTEGRATED SAVING SYSTEM WHENEVER PEOPLE PAY BILLS, WITHDRAW MONEY, BUY SOMETHING OR RECEIVE SALARY AND ALSO ADVOCATE FOR A NEXT OF KIN AGENCY

Triple D Empire (formerly Dithree Group) creates business models and social programs of articulating public policies into private projects. Mobilize domestic resources of creating collective prosperity opportunities. And propose public sector solutions of bridging private sector challenges. This teamwork, mental work and network instills a sense of direction, a sense of dignity and a sense of belonging in Africans to speak with authority in the global economics. Hence de-colonizing Africa because the great wall was not built in one day.

Therefore, this is to propose that Carrefour market, Absa bank, Sanlam Insurance, MTN, National Social Security Fund, National Water and Sewerage Corporation, Uganda Revenue Authority and Umeme/UEDCL create an integrated system which enables people to indirectly save five (+/-) percent for tax, land, insurance, education, social security or capital **whenever they pay their Umeme/UEDCL bills, withdraw money from their Absa bank account, buy something from Carrefour market, withdraw money from their MTN mobile money, pay NW&SC bills or receive salary from their employers** so as to revolutionize the saving culture because you enjoy a wider outlet network and the largest market share in Uganda. There is also need for insurance companies to advocate for the creation of a Next of Kin Agency (NoKA) as detailed herein.

A subscriber will have to open up an account with URA, Sanlam Insurance or NSSF then sign up with Umeme/UEDCL, Absa bank, NW&SC, Carrefour market or MTN to secure their security. The integrated system should automatically deducts a percentage at the expense of the subscriber and emit it direct on the subscriber's saving account. The system should have both saving options and percentage options to enable the subscriber to make their choice. The tax saving scheme will enable people to save for their trade license etc. and it will work as a collateral for clearing tax obligations. While the Capital Saving Scheme will necessitate Banks to create a provision of a Flexible Deposit Account. And as such, Triple D Empire is waiting to hear from you if the concept will contribute to the welfare of your business because there are many solutions of the changing world laying ahead beyond really calling for the thinking outside the square in the best interests of both the vendor and the consumer which propel a cashless economy.

Just open up an account with Sanlam Insurance then sign up with Umeme/UEDCL saving scheme to secure your security with a scheme of your choice. But always keep your records or demand for your receipt.

Next of Kin Agency (NoKA)

Whereas insurance provide a guarantee of compensation as much as social security provides retirement sources of income, **MOST** parents who save for their children's future are facing a profound challenge when they die simply because most of the next of kin convert the insurance fees for their personal interests at the expense of the beneficiaries which cause the deceased's to toast and turn in their grave hence making the insurance close to useless for **MOST** of our friends and relatives have a high deficit of integrity to an extent that they are preying on our properties and assets even when we are still alive. Therefore, there is also need for the insurance companies (**through your umbrella body**) to partner with the Administrator General (**Government**) on creating a Next of Kin Agency (**NoKA**) which represent the deceased's insurance interests.

- a) On 15 January 2025 Triple D Group proposed under Ref: TDE-10/15/01/25 that government invites drivers, vendors, riders and conductors for consultation of establishing national federations which provide them with medical insurance, social security saving and enforce tax compliance as per the attached copies.
- b) On 12 February 2024 Dithree Group (**now Triple D Empire**) proposed under Ref D3G-11/12/2/24 that government should ensure that anyone who has a national I.D card has a TIN number connected to their phone number (s) so as to automatically disconnect them from communicating until they clearing their income tax.
- c) On 28 May 2024 Dithree Group (**now Triple D Empire**) proposed under Ref: D3G-35/28/5/24 that Uganda National Students Association and Ministry of Education and Sports invite with insurance companies and commercial banks to create a Student's Future Fund for Capital (**SFFC**) which any school dropout or graduate can use to start a business or to go for further studies so as to enable graduates who fail to secure employment and dropouts who fail to graduate create their own business. The **SFFC** should be deducted from the student's fees and tuition by a certain percentage right from primary school fees throughout university.

Agenda 2063 and Vision 2040 emphasis the need to mobilize domestic resource for collective prosperity and sustainable development and as such, it is incumbent upon. It is now incumbent upon you to collectively push for a cashless economy which enables all Ugandans to save indirectly at their convenience to an extent that the Tax Saving Scheme will help taxpayers to meet their obligations on time were in the near future it will be used as collateral for clearing goods and services. Otherwise, both the Quran in Surah Al-Imran 3:104 and the Bible in Mathew 9:35-37 complement each other on the fact that African challenges called Triple D Empire to apply the mind on a full state of identifying African Solutions jealously, on principle and by conviction outside the square because a successful society is based on the skills and values of its leadership. The economic success of a nation is based on each individual business and job. Leadership is the process of social influence where one person mobilizes the aid or support of others in the accomplishment of a common goal or task. While development is the changing of society with effects to its norms, values, institutions, attitude of its people, methods of production and the way in which resources are distributed for the attainment of total the transformation. But the only way African governments can guaranty development is by **STRICTLY** appointing professionally competent ministers, technocrats/civic servants, politicians of integrity with better remuneration **ON CONDITION** that they take full responsibility of the failure or the success of the organization, ministry or department because politicking for personal interests is failing many development projects yet political will plays a major role in propelling national interests. **For African and Our Company**
