- The Executive Director, National Agricultural Advisory Services
- The Managing Director, Davis & Shirtliff

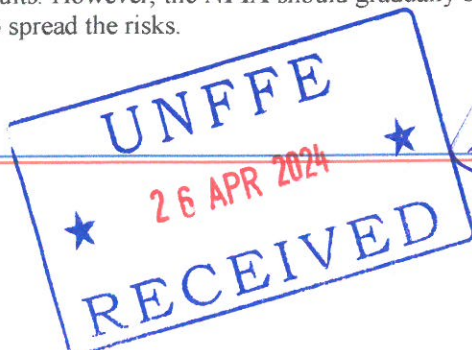

Dear Sir/Madam,

ENACTS ANIMAL CRUELTY LAWS WHICH PENALIZE MARKET VENDORS

To promote collective prosperity, social responsibility and sustainable development in the best interest of animals, humans and birds, this is to propose that

1. **Ministry of agriculture, animal industries and fisheries** enacts animal cruelty laws which penalize truck drivers who load animal/birds on the trucks and tie them in a painful manor which leads them to bleed or die in transit before they reach the market.
2. **Ministry of local government** creates a National Market Vendors Association (NMVA) and then invite all market vendor associations to buy forty percent (40%) shares in the NMVA on condition that the land titles of all markets countrywide are transferred in the name of NMVA were all the non-tax revenues of from the market are deposited on the bank account of NMVA.
3. **Uganda National Farmers Federation** and **National Agricultural Advisory Services** create a National Farming Investment Agency (NFIA) which partner with land owners to plant or rare on condition that that NFIA provides the farming facilities and then share the profits with the land owners after harvesting. Appoints Davis & Shirtliff to build automatic irrigation systems in dry place like karamoja etc. which draws water from the ground to fill the reserve tank(s) and automatically sprinkle the garden at night between 08:00pm and 02:00pm. Mobilize commercial Farmers to hire prisoners on reducing the cost of planting, weeding and harvesting their farms or gardens. And Works with Uganda Prison Services to meet the demand of hiring prisoners because the number of prisoners in Ntawete prisons does not meet the demand of commercial farmers in the area. While farmers who have with goats, cattle, sheep etc. use fruit trees to partition, shade and fencing your farms so as to mitigate the effects of climate change while producing surplus fruits. However, the NFIA should gradually sell forty percent (40%) shares to the public through an IPO so as to spread the risks.

4. **Bukedde TV, Centenary bank and Airtel** collectively award interest free loan to clean organized market vendors and abattoir operators who have delicious Rolex, food, kikomando, modern meat storage facilities, fancy fruits, foods and vegetable stalls or modern slaughter chambers. The winner(s) should service the loan using his/her Airtel money to deposit the loan on his/her centenary bank account.

The NMVA should renovate old /construct new markets and panelize vendors who don't wear association caps/aprons while on duty on top of ensuring that each market has a garbage collection truck which ease the delay of waste disposal. While parents buy a pet animal or a pet bird for your child/children so that they grow up with a sense of empathy that cares for others especially when they become leaders.
