

REF: D3G-46/4/10/24

- The Executive Director, National Information and Technology Authority
- The Managing Director, Huawei Uganda Limited
- The Dean, Faculty of Computing & Information Technology, Makerere University
- The Honorable Minister, Science, Technology & Innovation Secretariat
- The Dean, Faculty of Engineering & Computer Science, Victoria University

Dear Sir/Madam,

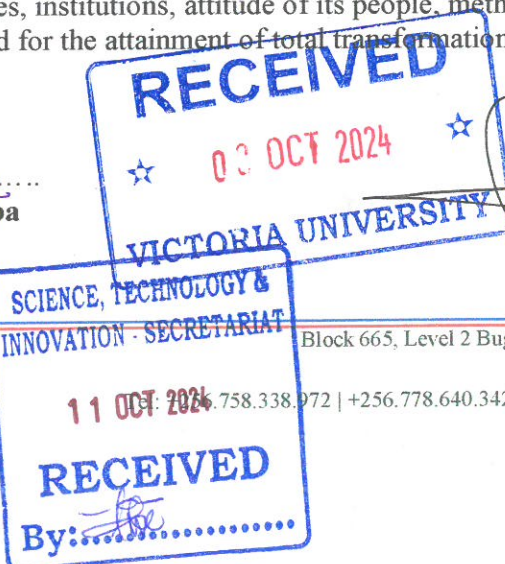

COORDINATE AFRICA'S OPERATING SYSTEM, SEARCH ENGINE AND APP STORE

Dithree Group is a private company that mobilize domestic resources for the creation of collective prosperity opportunities and sustainable development projects through advisory services, holding services, asset management as highlighted on our website so as to articulate **AGENDA 2063** into Business Models and Social Programs that bridges African challenges with African solution. This teamwork, mental work and network of investment partnerships, development proposals and joint ventures instills a sense of direction, a sense of dignity and a sense of belonging in the African dream. And as such, this is to propose that National Information and Technology Authority partners with Huawei Uganda Limited on mobilizing and coordinating all Universities in African counties to collectively develop African computer and phone operating system, search engine and app store which are compatible the current dominate operating system and search engine.

On the **22 April 2024** Dithree Group proposed under Reference No. **D3G – 19/22/4/24** as per the attached copy that ministry of STI and ministry of ICT to mobilize Ugandans use their own money to develop any scientific or technological innovation/invention on condition that the ministry finance the patenting and commercialization of the innovation/invention in exchange of twenty percent (**20%**) shares for sale to the public to recoup the investment because currently most of the people who benefit from government's innovation funds are not scientific or technological innovators or inventors. On the **22 April 2024** Dithree Group proposed under Reference No. **D3G-8/22/4/24** that Uganda Prison Services (UPS) and Uganda Police Force (UPF) shifts from the old system of data storage in books by appointing Huawei to supply reception computers countrywide were UPF has a centralized data and UPS as well on condition that both UPF and UPS pays Huawei in installments every financial year. Both the Quran in Surah Al-Imran 3:104 and the Bible in Mathew 9:35-37 complement each other on the fact that African challenges called Dithree Group to apply the mind on a full state of identifying African Solutions jealously, on principle and by conviction outside the square because a successful society is based on the skills and values of its leadership. The economic success of a nation is based on each individual business and job. Leadership is the process of social influence where one person mobilizes the aid or support of others in the accomplishment of a common goal or task. While development is the changing of society with effects to its norms, values, institutions, attitude of its people, methods of production and the way in which resources are distributed for the attainment of total transformation

Yours Faithfully,

Ddembe Diamond Disc Ddumba
