Your Excellence

DEFLECTING IMPERIALISM AND REBELLION FROM AFRICAN COUNTRIES

In respect of attaining bargaining power of deflecting imperialism and neo-colonialism of facilitating wars, sanctions, coups, homosexual and terrorism throughout African countries like Sudan, Mali, Somalia, Ethiopia, DR. Congo, Chad, Libya, CAR etc., this is to propose that African Union

1. Mobilize Africans to use their phone mobile money on contributing at least zero point two seven dollars (US\$- 0.27) to raise the one-million-dollar (US\$-1m) Ballot Bullet Bounty (BBB) for each rebel leader / warlord captured and handed over to ICC on a basis of an attack on one African country is an attack on all African countries.
2. If the war is facilitated by western country(s) or their ally (ies), boycott the goods and brands from such western country(s) or their ally (ies), forcing their service provision companies to sale fifty percent shares to Africans and also halt selling minerals to such a country(s) or their ally (ies). And invite BRICS Business Council to coordinate trade reciprocation in local currencies, investment partnerships, barter trade and sports games so as to attain economic independence that leads to political independence.
3. Appoint China to construct airstrips, install solar panels, construct railways, install wind turbines and to construct roads on all Africa's no man's land borderlines on a basis of Build, Own, Operate and Transfer (BOOT) so as to tame illicit porous border trade. And also ensure that all Africa-China Summits, Africa-America Summits, Africa-Russia Summits, etc. are held in Africa on a rotational basis were all African heads of states share a common agenda of articulating Africa's agenda 2063 so as to spar Africa's private sector business because china, America, Russian etc. being developed countries unlike Africa, they need Africa's market and minerals as much as Africa needs their trade and investments.

4. If such countries are facing oppressive governments or dictatorship regimes mobilize them not to sale or buy anything to or from any serving police officer, politician, Judges, civil servant, MPs, military officer etc. of such a regime or government including not to sale or buy anything from or to the relatives and friends of police officers, politicians, Judges, civil servants, MPs, military officers etc. of such a regime or government. And to attain economic independence that leads to political independence by invite BRICS Business Council to coordinate trade reciprocation in local currencies, investment partnerships, barter trade and sports games. Tame clandestine moves of exploiting and destabilizing the country by ensuring that all United Nations Security Council operations in Africa are coordinated by African Union Security Council. Substitute foreign aid with corporate social responsibility. Grant dual citizenship to Palestine migrants. Borrow for production instead of consumption. And substitute political greed with people needs.
5. **BRISC Business Council** develop a Trade and Investment Reciprocation Program (**T&IRP**) for countries like, Palestine, Southern Sudan, Venezuela, Mali, Cuba, Somalia, Lebanon, Ethiopia, Syria, DR. Congo, North Korea, Chad, Afghanistan, Libya, Yemen etc. so as to spar global trade and investment.
 - It should be a policy for African Governments to stop issuing National I.D cards, Driving license, Passports, academic transcripts etc. to Africans who have colonial names so as to spiritually and emotionally disconnect ourselves from the bondage of colonialists to an extent that Africans whose National I.D cards, Driving license, Passports and academic transcripts carry the names of colonialists should be given an ultimatum to drop/abandon the colonial name were also GMOs and LGBTQs should as well be forbidden by African culture and Africa constitution.

The mobilization should include Africans in the Diaspora not to buy any product or service from any Diaspora company were such police officers, politicians, Judges, civil servants, MPs, military officers etc. hold shares or interests until the oppressive governments or dictatorship regimes falls. In Africa's multiparty dispensation, it should be a policy for the presidential candidate, who scores second, becomes the head of government business and the one who scores third to become the speaker of parliament on condition that all political parties are represented in the national election body on to of having crowd funding bank accounts were their supporters can donate using mobile phones. If political power fails to enforce the rule of law and the people power fails to enforce mob justice, the gun power will be the only option.

Yours Faithful,

Ddembe Diamondisc Ddumba
Chief Executive Officer
